Myrtle Rust response – Long Term Management

GIA is a different way of delivering Biosecurity

Outside of GIA

- MPI decides response and strategy
- Determines stop and start
- Initiates transition
- Government pays
- Industry 'consulted'
- May or may not undertake surveillance or maintain laboratory capacity
- Ad-hoc assessment of new risks
- Cost recovery

Under GIA

- Government and industry make joint decisions on response
- Response costs shared after 2017 – in-kind contributions, accessing industry expertise
- Pre-agreed response strategy
- Joint readiness activities
- Leverage co-investment
- New and emerging biosecurity risks – targets for early detection
- Engagement in risk reduction strategies
- Fiscal cap, transitional discounts

GIA - Current Status

- **Signed (15)** - Kiwifruit, Pork, Pipfruit, Equine, MPI, Onions, FOA, Avocado, Citrus, Nashi, Kiwiberry, Tomatoes, Vegetables, Potatoes, Winegrowers (Deed Governance Group)
- **A number are progressing to sign** – expect more over next few months (Summerfruit, Process Vegetables, Livestock sectors), Between 25 – 30 potential signatories.
- **Engaging in an Operational agreements** –Fruit Fly Council, Livestock Council, BMSB Council, Kiwifruit Sector, other sector specific OAs underway
- **Response Activities** – Industry participation (YSSB; QFF; Velvetleaf; Eucalyptus Beetle, Pea Weevil, Myrtle Rust, Other)
- **Revised Governance Framework** – Deed Governance Group; Executive Committee; Sub-groups, new GIA Company
- **Focus for 17/18** – Signatory support, near-signatory support, OAs, Cost-sharing infrastructure, MPI cost-recovery

GIA - Attaining Mandate

- Body corporate
- Define your sector as set out in the Biosecurity Act
- Develop a sustainable funding model to meet GIA commitments
- Develop and implement a consultation plan – prove you have a mandate to represent you sector
- Consult and listen to feedback
- Seek Minister's approval
- Talk to MPI at every step of the way
